EVENTS

Our event apps enhance physical stands with digital interactivity, improving visitor experiences.

They facilitate information sharing, networking, and exploration, ensuring memorable engagements

PLAY VIDEO

ANAMORPHIC ANIMATIONS

3D anamorphic animations bring content to life, creating stunning visual illusions that captivate and engage audiences in any setting

PLAY VIDEO

PLAY VIDEO

MULTI-TOUCH

Multi-Touch applications transform surfaces into interactive platforms, promoting teamwork and easy exploration of content, perfect for learning and discovery in shared spaces

PLAY VIDEO

UNCONVENTIONAL INTERACTIONS

Unconventional Interactions involve creative tech solutions like sliding screens, transparent displays, projections and sensors, offering unique ways to engage with content

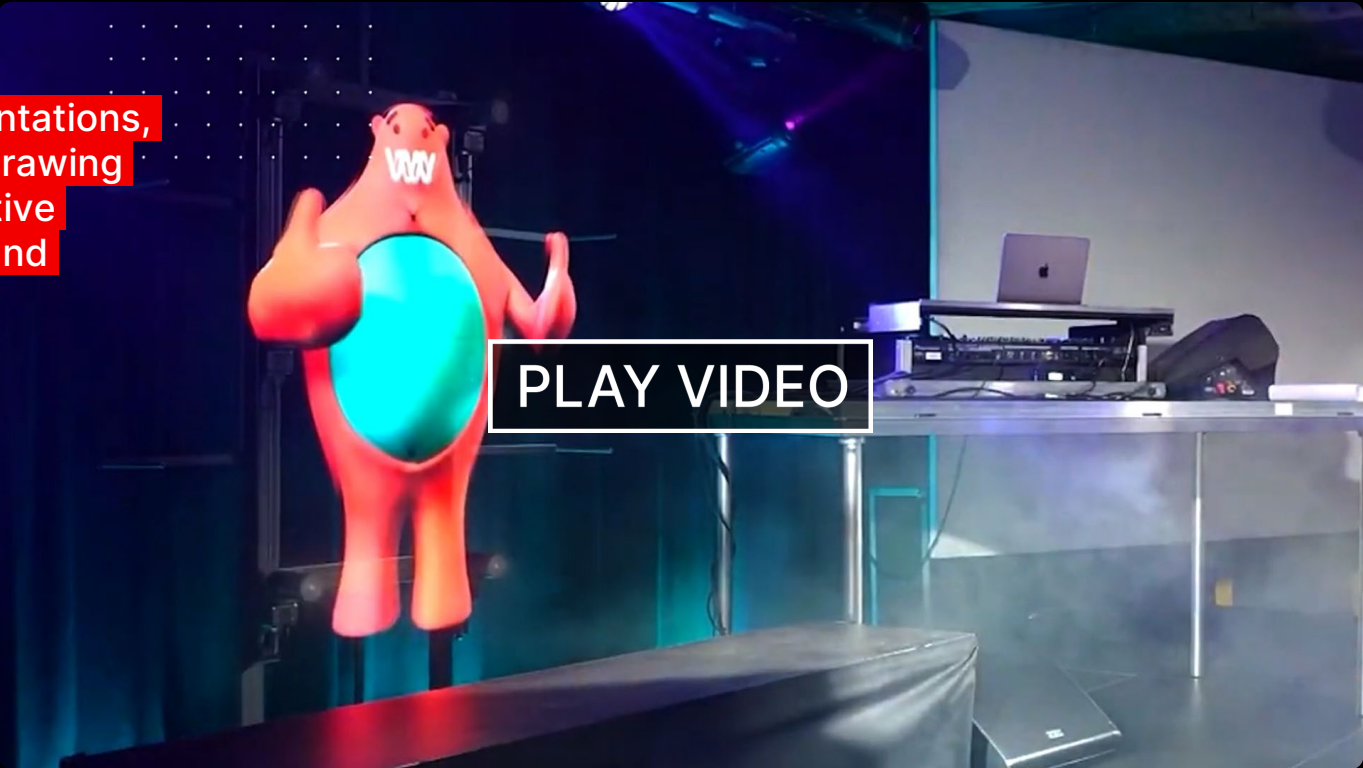

PLAY VIDEO

EXPERIENCE CENTERS

Experience and Visitor Centers transform into immersive spaces, promoting deep engagement through interactive storytelling and active participation

PLAY VIDEO

HOLOGRAMS

Holograms add a futuristic touch to presentations, projecting 3D images that seem to float, drawing in viewers with lifelike visuals and interactive features, ideal for captivating audiences and enriching narratives

PLAY VIDEO

2D / 3D ANIMATIONS

2D and 3D animations transform ideas into dynamic visuals, bringing characters and settings to life.
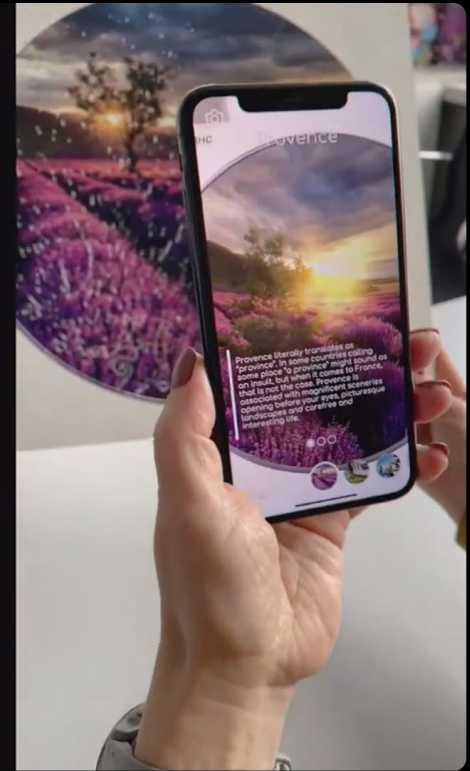

They simplify complex concepts and enhance storytelling, making them ideal for educational content and promotions

PLAY VIDEO

AUGMENTED REALITY (AR)

Augmented Reality adds moving animations and graphics to camera feeds, capturing attention and enriching stories beyond the visible.

It effectively sparks curiosity and shares information

VIRTUAL REALITY (VR)

Virtual Reality immerses users in 360-degree environments, offering deep engagement and connection to content.

It's ideal for interactive storytelling and vivid explorations, transporting audiences to worlds beyond their imagination

PLAY VIDEO

AI ASSISTANT

AI Assistants streamline interactions with smart, personalized responses, enhancing user experiences by providing efficient support and data-driven insights, perfect for modernizing service and engagement

PLAY VIDEO

PROJECTION MAPPING

Projection Mapping transforms ordinary surfaces into stunning visual displays, covering existing spaces in vibrant imagery for immersive storytelling, perfect for creating unforgettable experiences and interactive environments

PLAY VIDEO

ROBOTICS

Elevate your event with our advanced robotic arms, combining tech and creativity for a stunning visual spectacle.

Ideal for interactive installations and dynamic displays, these arms enhance any event theme, ensuring a memorable experience
